Your clinic needs are answered with one simple, turn-key software solution

Doctors EHR

It helps the physicians in handling all their day-to-day activities like viewing the list of appointments, on-line ordering of lab investigation, procedures, drugs and consumables along with capturing of diagnosis of patients.

Patient Master Index

Patient registration and current visit modules form the integral part of PMI. It provides interface with appointment modules, doctor(provider) clinics and OP billing the system generates a unique identification number for each patient.

Inventory

General Stores and Inventory module deals with Purchase of Items, Issue of Items, Maintenance of Stock, Automatic Reorder level Setting, Online request for stock from various sub-stores, Online stock transfer, maintenance of stock at different sub-stores, Physical stock verification and adjustment, Return of items to supplier etc.

Billing

The Billing module is very comprehensive and central to the application allowing data integration across various modules to track the patient's bills centrally. It has the facility to allow bills to be raised as credit or cash. It allows for discounts to be given at item level and the hospital manager can take a report of all the discounts at any time. All the rates for all services are controlled through rate master defined centrally. Billing also takes care of calculation of co-pay and deductibles based on the insurance policy of the patient.

Insurance & Claims Mgmt

Complete medical insurance claim processing solution. Docmate helps Healthcare Providers to prepare their e-claims submission to insurance companies and health authorities. Docmate generates the insurance claims in XML format as required by the HAAD & DHA

Laboratory

The Laboratory module automates the investigation request and the process involved in delivering the results to the concerned department/doctor of the hospital. The Laboratory module caters to Biochemistry Cytology, Hematology, Microbiology, Serology and Neurology.

MIS Reports

The Flexible Reporting works as an effective analytical tool to measure the performance of the organization across doctors and staff. Some of basic reports includes financial reports, billing reports, Patient Stats Report, Inventory Related reports, Clinical Data Reports, Insurance Reports

Registration & Schedulers

This module provides for the Patient Demography and Visit information recording. It provides for flexible Patient Categorization for quicker access to default registration information, so that the registration can be done quickly by the front desk operator. Reduce Cancellations and no-shows! Send reminders by email, SMS text or automated phone calls

So much more than a scheduler and a billing system.

The most advanced fully web-based practice & patient management system on the market. Genuine web software
